Hotlinks is a Limited company based in the commercial heart of London's Docklands. We provide high bandwidth Information and Communication Technology (ICT) network services for Homes, Businesses and ISP's.

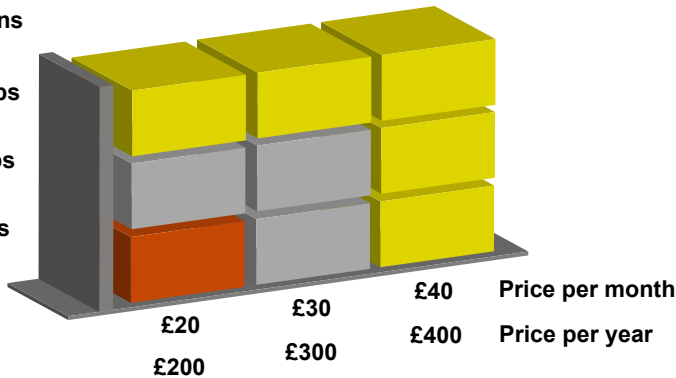

A simple, "no expense spared" philosophy utilising best of breed technology from the leading manufacturers ensures our services are among the most reliable in the industry.

- Hotlinks now offers fast, reliable ADSL access to homes and businesses in the UK.
- Unlike other ADSL accounts, Hotlinks allow you to stay connected as long as you want, download or upload as much as you want without any limits or extra hidden charges.
- ADSL enables you to fix your monthly Internet bill. Rather than paying for every time you connect through your phone bill, you pay a fixed monthly fee for your account, and that's the only thing you pay for a whole month!

- We offer two solutions for ADSL, one for Home use and one for Business use.

Home User 50:1 Bandwidth Options

- Gold - 2mbps
- Silver - 1mbps
- Bronze - 512Kbps

Over the years, we have recognised that keeping up with current trends is vital to remaining successful as an ISP, so you can rest assured we are well in touch with what is happening throughout the ISP industry.

We like to think of ourselves as being 1 step ahead of our competitors so that we put our customers 1 step ahead of theirs.

Here are just some of the reasons why you would want our ADSL:

- It runs at least 10 times faster than a painstakingly slow Dial-up connection.
- You only pay one monthly or yearly fee for the service - no cost per minute.
- You can use your telephone line at the same time as being on the internet.
- You are permanently connected to the internet - no need to sign in.
- Our prices are competitive and in line with our main competitors.
- Interested in server colocation or buying a bandwidth connection via our network at Redbus? Then please call the number below for further assistance...
